

System Requirements

To use this POS system, you need the following:

1. Device Requirements

A smartphone, tablet, or computer with an updated web browser (Google Chrome, Safari, Firefox, Edge).

Internet connection (Wi-Fi or mobile data).

2. Crypto Wallet

A decentralized crypto wallet such as MetaMask, Trust Wallet, or Binance Wallet.

Your wallet should support USDT (Tether) on supported networks (e.g., Ethereum, BSC, Tron, etc.).

3. Supported Payment Methods

Manual card entry (Customer enters payment details).

Pre-auth codes (4 or 6-digit codes for authorization).

Apple Pay tap payments (Tap to pay functionality).

4. Web Access

Your POS system will be hosted at: [Your GitHub Pages link]

Make sure the site is live before processing transactions.
