Installation & Setup

Follow these steps to set up and start using the POS system:

1. Open the POS System

Go to [Your GitHub Pages link] in your web browser.

Ensure you have a stable internet connection.

2. Connect Your Crypto Wallet

Click on the "Connect Wallet" button.

Select your wallet provider (MetaMask, Trust Wallet, Binance Wallet, etc.).

Approve the connection request.

3. Select Payment Method

Choose one of the available payment options:

Manual Card Entry: Enter card details manually.

Pre-auth Code: Enter a 4 or 6-digit authorization code.

Apple Pay Tap Payment: Use Apple Pay on compatible devices.

4. Complete the Transaction

Confirm the payment amount.

Click "Process Payment" to initiate the transaction.

Wait for a confirmation message.

5. Verify Payment

Check your crypto wallet to confirm the payment has been received.

Transaction details will be recorded in the wallet history.
